SUMMARY

MERN stack developer with hands-on experience in building and deploying responsive web applications. Proven ability to translate Figma designs into pixel-perfect components and develop secure RESTful APIs. Eager to leverage strong problem-solving skills to contribute to a dynamic engineering team and build impactful software.

EXPERIENCE

Junior Software Developer | Fairchance for CRM

01/2025 - Present Lahore, Punjab, Pakistan

- Developed dynamic and responsive UI components for the CRM using React.js, creating interfaces for data entry, contact lists, and user profiles.
- Translated Figma/UI mockups into pixel-perfect, reusable components with HTML5, CSS3, and Tailwind CSS.
- Implemented client-side logic using React Hooks to manage component state, handle user input, and interact with the backend API.
- Implemented a system-wide search and filtering functionality, enabling users to quickly query the MongoDB database for specific customer records.

Internship

KICS

08/2024 - 10/2024 Lahore, Punjab, Pakistan

- Analyzed user requirements and collaborated with a team to develop software solutions for industry-specific problems.
- Collaborated with senior developers to design, code, and implement new front-end features, focusing on responsiveness and functionality.
- Built and refined user interfaces in React, ensuring optimal performance and a consistent user experience across devices.

PROJECTS

TrendHive - Full-Stack E-Commerce Platform

<https://trend-hive-two.vercel.app/>

Tech Stack: JavaScript, React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Stripe API

- Engineered a responsive platform featuring a persistent cart, product search/filtering, and a secure checkout process powered by the Stripe API.
- Developed a secure RESTful API, implementing JWT authentication and a role-based admin dashboard for complete product and order management.

FreshFromTheField

<https://freshfromthefield.vercel.app/>

Tech Stack: JavaScript, React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS

- Engineered a comprehensive order management system, introducing a full "Add to Cart" and checkout workflow for buyers and a dedicated dashboard for farmers to manage and track orders (Pending, Accepted, Shipped).
- Architected the backend with new RESTful API endpoints and database schemas to support the order lifecycle, implementing role-based access controls and notification system.
